PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years building fault-tolerant, high-availability, low-latency, high-throughput, distributed systems and real-time orchestration platforms at production scale. At Microsoft, I led the design of orchestration platforms managing 1,300+ production servers, enabling zero-downtime migrations, cutting incident detection time by 20%, and reducing operational overhead across engineering teams. Deep expertise in C#/.NET, micro-services, Kubernetes (AKS), and cloud-native architecture on Azure.

EXPERIENCE

Microsoft | Software Engineer – Backend & Distributed Systems | Aug 2022 – Dec 2025 | Dallas, TX

- Owned the design of a fault-tolerant distributed orchestration platform in C#/.NET Core, managing configuration state transitions across 1,300+ production servers, **enabling zero-downtime cloud migrations**, and eliminating unplanned maintenance windows that previously impacted engineering velocity.
- Drove re-architecture of configuration-as-code and IaC pipelines to decouple cloud dependencies and introduce modular orchestration layers, **reducing configuration-driven production incidents and cutting deployment cycle time** — improving release efficiency across multiple engineering teams.
- Built observability infrastructure with 30+ Grafana dashboards and 100+ alerts.
- Reduced incident detection time (MTTD), **improved on-call response efficiency** by 20%, and met SLO targets.
- Led platform security hardening: implemented OAuth 2.0 / MSAL, migrated from mTLS to Proof-of-Possession (PoP) tokens, and extended Azure NSGs to Redis, Key Vault, CosmosDB, and Blob Storage — **eliminating key attack surfaces** and **reducing compliance risk** across the platform.
- Drove cross-team collaboration across infrastructure, security, and deployment teams to deliver a **Kubernetes (AKS) containerization strategy, enabling horizontal scaling, standardizing deployment practices**, and reducing per-service operational overhead for engineering teams.

Paycom | Software Engineer – Full Stack | Jun 2021 – Aug 2022 | Dallas, TX

- Led migration of critical modules from a legacy PHP MVC monolith to a modern React + Node.js architecture supporting high-concurrency enterprise workloads, delivering a **25% improvement in application performance** — directly reducing page load times for thousands of concurrent enterprise users and improving business user productivity.
- Co-designed and **delivered 3 customer-driven features** used by hundreds of concurrent users in cross-functional collaboration with product, QA, and business stakeholders, accelerating release velocity and driving measurable improvements in customer outcomes.

Tata Consultancy Services | Associate Systems Engineer | Jun 2018 – Jun 2019 | Hyderabad, India

- Remediated 98% of 12,000 vulnerabilities across production-scale infrastructure, **improving system security** and **uptime reliability** for Mars, Incorporated, reducing enterprise security risk, and ensuring compliance across the VMware infrastructure.
- Managed Active Directory across enterprise-scale environments, **enforcing secure** and **reliable access control** and Group Policy Objects (GPOs), reducing unauthorized access risk across the enterprise environment.

TECHNICAL SKILLS

- Core:** ASP.NET Core, REST APIs, Microservices, Event-Driven Architecture, Distributed Systems, High Availability, Fault Tolerance, System Design, SDLC
- Languages:** C#, Java (8/11/17), JavaScript (ES6+), TypeScript, Python, C++
- Cloud & Infra:** Azure (AKS, CosmosDB, Key Vault, Blob Storage, Redis), Kubernetes, Docker, Infrastructure as Code (IaC), AZ-900, AI-900, AWS AI Practitioner, AWS Certified Cloud Practitioner
- Security:** OAuth 2.0, JWT, MSAL, Proof-of-Possession (PoP), mTLS, Network Security Groups (NSG)
- DevOps & Tools:** CI/CD, Azure DevOps, YAML Pipelines, Git, Grafana, Application Insights, Agile / Scrum
- Databases:** SQL Server, PostgreSQL, MySQL, Redis, CosmosDB

EDUCATION

M.S. Computer Science — Texas Tech University — Lubbock, TX | Aug 2019 – May 2021 | GPA: 4.0/4.0

B.Tech Computer Science — Andhra University — Vizag, India | Sep 2014 – May 2018 | GPA: 8.0/10.0
